Estonian Language and Adaptation Courses for New Immigrants in Estonia

The programme is designed for newly arrived immigrants, who are citizens of EU and third countries, and is intended to facilitate their integration in Estonia.

The course is 5-6 months long and takes 3 hours twice a week:

The programme comprises of:

- 1) the Estonian language courses at the level of A2 (360 hours, 180 contact hours) and B1 (316 hours, 180 contact hours),
- 2) Basic course - lectures and tours introducing the life, culture and values of Estonian society and topics of socio-economic integration.

Estonian Language Course (A2 and B1)

The Estonian language course consists of the basic A2-level Estonian education, which enables to function independently in important areas of society. The course guides you through several communication situations of your everyday life and teaches you how to communicate most effectively in these situations. Themes covered during the

language course are based upon your needs in Estonia. Individual work is supported by the e-learning environment.

For those who are interested in applying for a long-term residence permit, or wish to work/study further in the Estonian language, the opportunity to learn the Estonian language at level of B1 is provided. The aim of the Estonian language course at B1 level is to develop the language knowledge from the basic level to the level of independent use of the Estonian language (the threshold of communication).

Basic Course

The volume of the basic course is 65 hours. The basic course introduces the history, geography, culture, life and society in Estonia, as well as the basic norms and values of Estonian society. As part of the basic course, knowledge of the country's current laws and the rights of residents can be acquired. Further assistance can be provided in finding information about housing, employment, health and social support services, education as well as in many other areas of everyday life.
